

Miljö & Avfallsbyrån / Milav

Collaboration – Comprehensive Views – Commitment

Waste management and environment

- Strategic Waste Management Plans, Local Regulations, Tariff systems
- Investigations on collection systems etc.
 - Circular economy
 - Trainings
 - Procurements
- Permits, Environmental Impact Assessments

The Problem of WASTE MANAGEMENT or the Opportunities of a CIRCULAR ECONOMY?

UN Sustainable Development Goals

Waste Management relates to almost every single SDG

From landfills to recycling facilities – an "eldorado" for the entrepreneurs

(Illustrator: Per Josefsson)

A few examples of possibilities

- Crushing – local entrepreneurs
- Sorting – local entrepreneurs
- Baling – national entrepreneurs. Baling equipment from Sweden
- Transportation – local entrepreneurs
- Civil works – local entrepreneurs
- Trading – local brokers
- Administration – local entrepreneurs. Special designed Swedish solutions, hardware & software
- Gas collection system & power generation –world leading technologies from Sweden

Recycling and treatment

– Different treatment methods depending on the character of the waste,
makes it possible to use the waste as a resource

– Materials

– New products

– Food waste

– Biogas

– Biofertilizer

– Combustible waste

– District heating

– Electricity

Sweden's Zero Waste Vision

Long-term goals:

- Decoupling between generated waste and economic growth
- Strong upward movement in waste hierarchy
